

PRODUCT CATALOGUE 2026

Natural Stone Catalogue

Onyx · Marble · Travertine

ABOUT US

Persian natural stone, selected at source.

Origin Build Materials supplies premium Persian onyx, marble and travertine to fabricators, distributors, designers and projects across more than 40 countries. From the quarry to the finished export container, we manage every step with precision.

Every slab in this catalogue is photographed on our stock floor, so what you see is the material you order. Slab sizes vary by block; contact us for current stock, dimensions, book-matched availability and container quotes.

THE COLLECTIONS

Onyx

Exotic Pink Onyx, Blue Onyx, Turquoise Blue Onyx, Deep Amber Onyx, Multi Color Onyx

PAGE 03

Marble

Persian Panda White Marble, Pure White Crystal Marble, Premium Dark Marble

PAGE 11

Travertine

Persian Red Travertine, Persian Silver Travertine

PAGE 16

PERSIAN SEMI-PRECIOUS STONE

Onyx Collection

Translucent, rare and made to glow. Our Persian onyx slabs are selected for vivid colour and clear crystalline pockets that come alive when backlit.

Light passes through. Colour comes alive.

Onyx is a naturally translucent stone. When it is lit from behind, its crystalline fields glow while the denser veining stays dark, turning a wall, bar front or reception desk into the focal point of a room.

Every slab in our collection is hand-selected at source for colour saturation, clarity and pattern, then photographed on our stock floor so you see the actual material you order.

01

Backlit-ready

Clear, translucent sections chosen specifically for even light transmission.

02

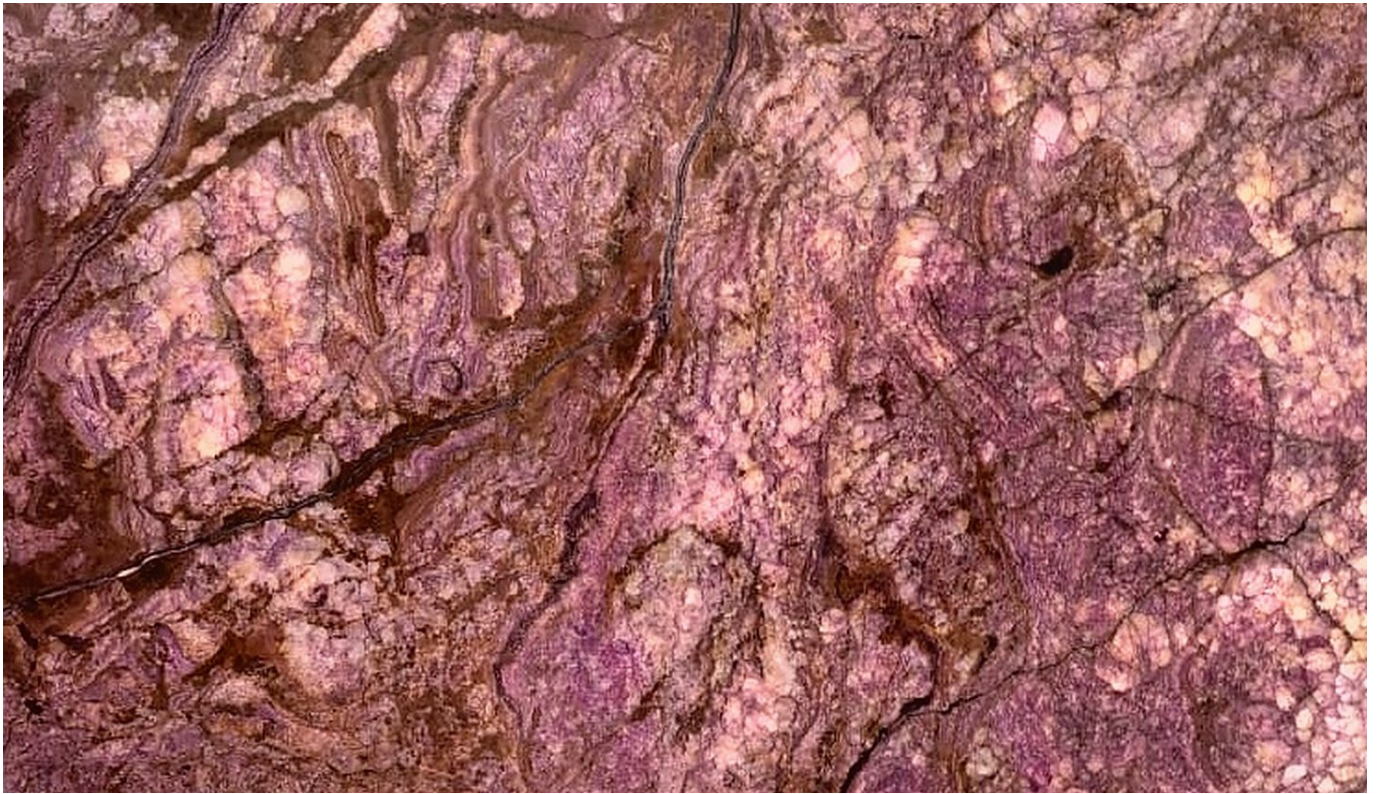

Book-matched

Sequential slabs available for symmetrical feature walls and bar fronts.

03

Bespoke fabrication

Cut-to-size panels, vanity tops and desk fronts made to your drawings.

ONYX COLLECTION · ALSO KNOWN AS PERSIAN PINK ONYX OR ROSE ONYX

Exotic Pink Onyx

Intense pink and violet crystal, bound by veins of rust and gold. Spectacular when backlit.

Material

Exotic Pink Onyx, a natural semi-precious stone also known as Persian Pink Onyx or Rose Onyx.

Visual Characteristics

The stone has a dramatic, heavily brecciated (fractured) structure. Intense pink, mauve and violet translucent crystalline pockets are bound together by thick, earthy brown, rust and golden veins.

Aesthetic & Application

Onyx is naturally translucent, which makes this vibrant slab ideal for backlit applications. Lit from behind, the pink and purple sections glow while the dense brown veining stays opaque, creating a striking luxury feature wall, custom bar top or high-end reception desk.

IDEAL FOR

- Backlit feature walls
- Custom bar tops and bar fronts
- Hotel and office reception desks
- Statement vanity tops

- Golden

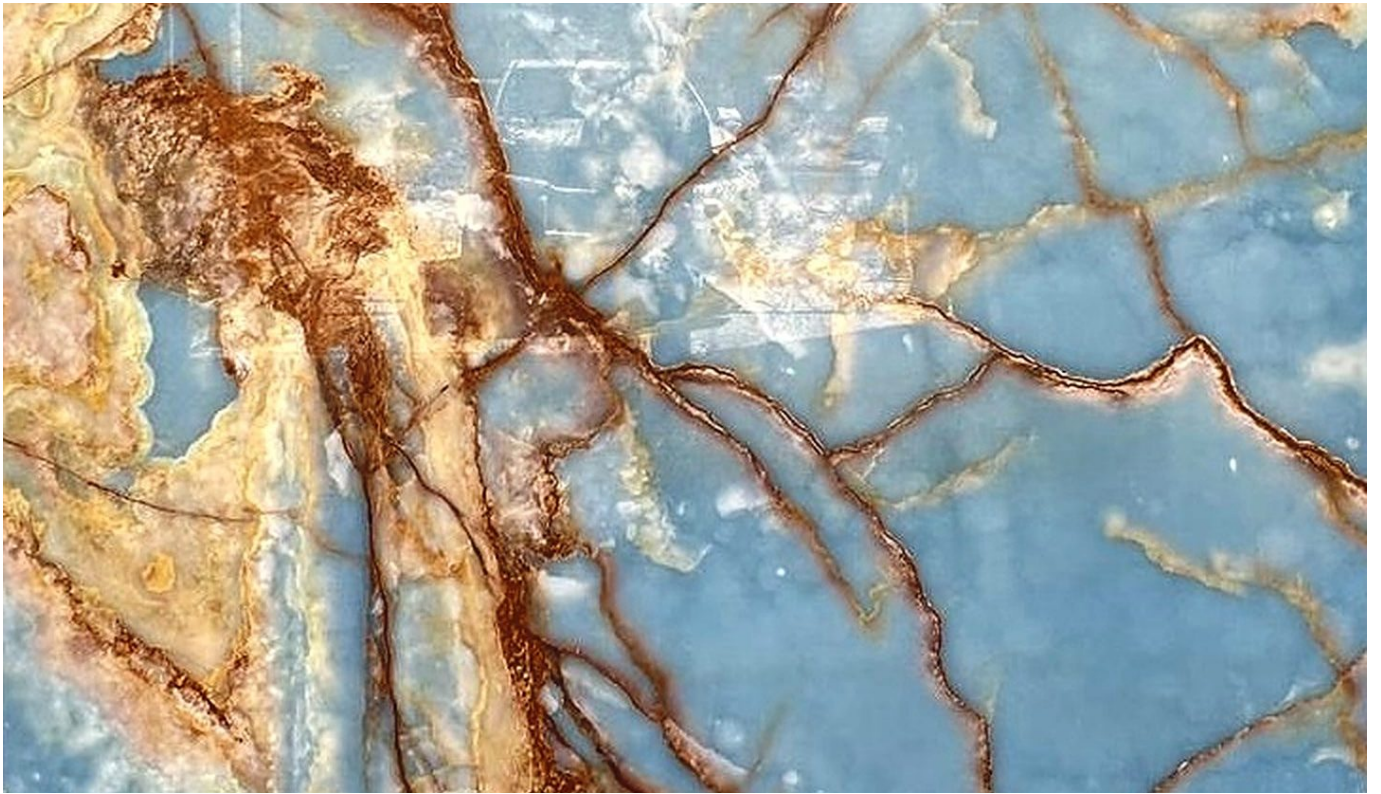

BACKLIT PRESENTATION

The same slab, lit from behind

Under direct backlighting the stone transforms. The dense veins of deep maroon, earthy brown and charcoal become a shadowed silhouette, while the translucent crystalline pockets glow with brilliant white, soft pink and warm amber.

This is exactly how Exotic Pink Onyx is used in high-end architectural design: illuminated feature walls, exclusive hospitality bar fronts, bespoke reception desks and dramatic custom vanities.

ONYX COLLECTION · NATURAL SEMI-PRECIOUS STONE

Blue Onyx

Icy sky-blue fields cut through by bold veins of rust, copper and gold.

Material

Blue Onyx, a natural semi-precious stone.

Visual Characteristics

This slab displays a brilliant, translucent sky-blue background dramatically intersected by bold, jagged veins of rust, copper and golden-brown. The contrast between the icy blue fields and the warm, earthy fault lines creates a highly dynamic natural artwork.

Aesthetic & Application

Its large, clear sections of blue transmit light beautifully when backlit. Blue Onyx is a premier choice for luxury focal points, including illuminated feature walls, bespoke hotel reception desks, statement bar fronts and high-end bathrooms.

IDEAL FOR

- Illuminated feature walls
- Hotel reception desks
- Statement bar fronts
- Luxury bathrooms

ONYX COLLECTION · NATURAL SEMI-PRECIOUS STONE

Turquoise Blue Onyx

A vivid, clear turquoise canvas with a few sharp veins of rust and deep brown.

Material

Turquoise Blue Onyx, a natural semi-precious stone.

Visual Characteristics

An extraordinary slab with an exceptionally vivid, uniform cyan and turquoise background. Unlike the more brecciated onyx slabs, it offers a clear, highly translucent crystalline canvas, crossed by a few sharp diagonal veins in deep rust and dark brown.

Aesthetic & Application

Its uniform structure and intense colour give unparalleled light transmission when backlit. A premium showpiece for high-end installations: glowing custom bar fronts, boutique hotel feature walls and striking reception desks.

IDEAL FOR

- Glowing bar fronts
- Boutique hotel feature walls
- Statement reception desks
- Spa and wellness interiors

- Dark Brown

ONYX COLLECTION · NATURAL SEMI-PRECIOUS STONE

Deep Amber Onyx

Deep amber, fiery gold, cocoa brown, warm cream and translucent ivory in one luminous slab.

Material

Onyx, a natural semi-precious stone.

Visual Characteristics

A warm, luminous palette of deep amber, fiery gold, cocoa brown, warm cream and translucent ivory. Large pale crystalline fields are traced with fine golden and brown veining across the slab.

Aesthetic & Application

The broad ivory and cream areas make this one of the most effective onyx slabs for backlighting, giving an even, golden glow. It suits feature walls, bar fronts, reception desks, lighting panels and luxury bathroom cladding.

IDEAL FOR

- Backlit wall panels
- Bar fronts and counters
- Reception desks
- Luxury bathroom cladding

ONYX COLLECTION · SEMI-PRECIOUS GEMSTONE SLABS

Multi Color Onyx

Hand-assembled semi-precious stone slabs in green, gold, ivory and purple.

Material

Multi Color Onyx, semi-precious stone slabs made from individually selected pieces.

Visual Characteristics

Each slab is a mosaic of polished, rounded semi-precious pieces framed by fine golden lines, with natural crystal banding inside every piece. Available in several colours: green, yellow, brown and ivory, and purple.

Aesthetic & Application

These slabs are fully translucent in the lighter pieces, so they are often backlit to create a jewel-like glow. They are a signature choice for luxury bar tops, feature walls, table tops, reception counters and bespoke furniture.

IDEAL FOR

- Luxury bar tops
- Backlit feature walls
- Table and counter tops
- Bespoke furniture

Each colour is assembled from hand-selected semi-precious pieces, so every slab is unique.

PERSIAN NATURAL MARBLE

Marble Collection

From bold monochrome statements to pure, quiet whites and deep architectural greys: solid, dense marble for surfaces that are meant to last.

Timeless surfaces with real presence.

Unlike translucent onyx, marble is an opaque, structural stone. It is the natural choice for kitchen islands, flooring, staircases and bathroom cladding where durability matters as much as looks.

Our range covers the high-contrast Persian Panda White Marble, a pristine Pure White Crystal Marble and a premium selection of dark marble finishes, all available as full slabs, book-matched pairs or cut-to-size.

01

Structural strength

Dense, opaque stone for floors, worktops and high-traffic areas.

02

Book-matched

Mirrored slab pairs for dramatic, symmetrical walls and islands.

03

Polished or honed

High-gloss or soft matte finishes to suit modern and classic spaces.

MARBLE COLLECTION · ALIGUDARZ CRYSTAL MARBLE

Persian Panda White Marble

Brilliant white crystal cut by a sweeping belt of deep black. Bold and architectural.

Material

Persian Panda White Marble, also known as Aligudarz Crystal Marble.

Visual Characteristics

A brilliant, pure white crystalline background dramatically intersected by a massive, sweeping diagonal belt of deep black and dark charcoal veining. The high contrast between stark white and heavy black creates a bold, monochromatic statement piece.

Aesthetic & Application

Panda White is one of the most prominent materials in contemporary luxury design. It is opaque and used for high-impact solid surfaces, and is frequently book-matched to create symmetrical patterns. It is the premier choice for luxury kitchen islands, staircase walls, expansive modern flooring and high-end bathroom cladding.

IDEAL FOR

- Kitchen islands
- Staircase and feature walls
- Modern flooring
- Bathroom cladding

- Deep Black
- Dark Charcoal

MARBLE COLLECTION · NATURAL STONE

Pure White Crystal Marble

Pristine, brilliant white with the faintest whisper of grey. Minimal and timeless.

Material

Pure White Crystal Marble, a natural stone.

Visual Characteristics

An elegant slab with a pristine, brilliant white background and a flawless high-gloss polish. Its clean, uniform appearance is interrupted only by the faintest whispers of light grey, delicate crystalline veining that add subtle natural texture.

Aesthetic & Application

A solid, opaque architectural stone with a timeless, minimalist look that instantly brightens a space. Its durability makes it a premium choice for luxury flooring, elegant kitchen countertops, sweeping staircases and clean, modern bathroom cladding.

IDEAL FOR

- Luxury flooring
- Kitchen countertops
- Staircases
- Modern bathroom cladding

MARBLE COLLECTION · DARK MARBLE & STONE FINISHES

Premium Dark Marble

A premium selection of dark marble and natural stone finishes, from classic veining to honed texture.

Material

Premium dark marble and natural stone finishes.

Visual Characteristics

Designed to suit both modern and classic spaces, these six variations offer distinct visual and tactile qualities: Dark/Classic, Lighter Grey, Intense Veining, Soft Clouds/Fossil, Warm Tone/Rust and Honed Finish/Texture.

Aesthetic & Application

Dark marble brings depth and drama to kitchens, bathrooms, feature walls and flooring. Choose intense veining for a statement kitchen island, a lighter grey for versatile everyday surfaces, or a honed finish for a tactile, low-sheen look.

IDEAL FOR

- Statement kitchen islands
- Bathroom walls and vanities
- Feature walls
- Flooring

SURFACE

Opaque, dense crystalline

COLOUR PALETTE

- Deep Slate
- Lighter Grey
- Warm Tone/Rust

Finishes and textures

Dark/Classic

A timeless, deep slate base with subtle, elegant veining.

Lighter Grey

A softer, highly versatile tone that brightens the space while maintaining depth.

Intense Veining

Striking, high-contrast white patterns ideal for creating a dramatic focal point, such as a statement kitchen island.

Soft Clouds/Fossil

Gentle, organic patterning that provides a natural, grounded aesthetic.

Warm Tone/Rust

Earthy undertones woven into the dark stone to add warmth and dimension.

Honed Finish/Texture

A sophisticated matte surface that offers a tactile, low-sheen appearance.

PERSIAN VEIN-CUT TRAVERTINE

Travertine Collection

Linear, layered and built for the outdoors. Vein-cut Persian travertine in striking red and contemporary silver, for facades, pools, paving and feature walls.

Ribbons of time, cut across the grain.

Vein-cut travertine is sliced against the natural bedding of the stone, revealing parallel bands of colour laid down over thousands of years. The result is a strongly linear, architectural surface.

Travertine is durable and weather-resistant, so it performs as well on a building facade or pool surround as it does on an interior feature wall. It can be supplied unfilled for a natural look, or resin-filled for smooth worktops.

01

Interior and exterior

Weather-resistant stone for facades, pool surrounds and paving.

02

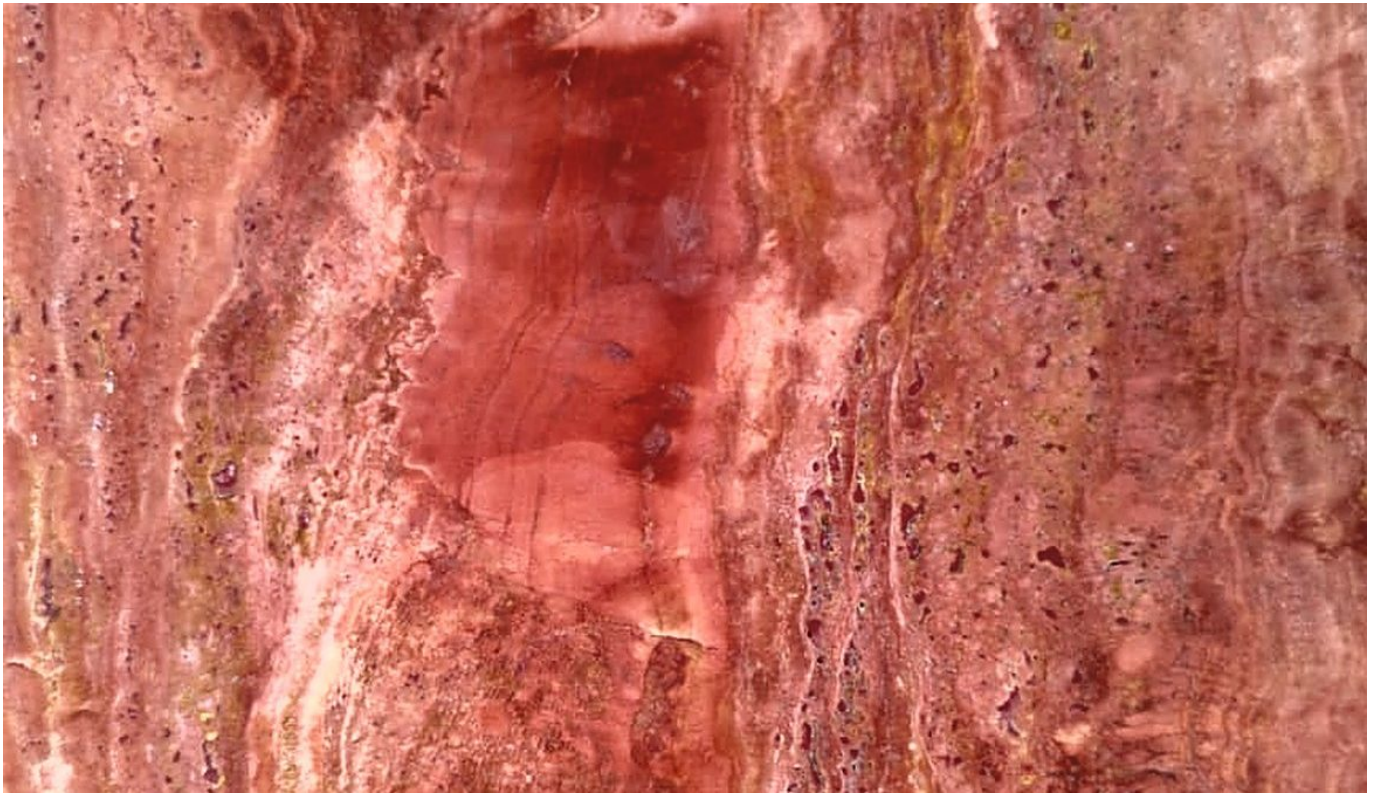

Filled or unfilled

Keep the natural open pores, or have them resin-filled for a smooth surface.

03

Linear vein-cut

Parallel striations that suit clean, contemporary architecture.

TRAVERTINE COLLECTION · VEIN-CUT

Persian Red Travertine

Deep terracotta and crimson, banded with ribbons of gold. A bold architectural statement.

Material

Persian Red Travertine, vein-cut.

Visual Characteristics

A vibrant background of deep terracotta, crimson and burnt orange. Because it is vein-cut (sliced against the natural bedding), it shows distinct, parallel sedimentary layers banded with ribbons of gold, yellow and pale white, and keeps the natural, porous surface of premium travertine.

Aesthetic & Application

Red Travertine makes a bold architectural statement. Its durability and resistance to weathering keep it in high demand for both interior and exterior use: striking building facades, outdoor pool surrounds, textured feature walls and bespoke patio paving.

IDEAL FOR

- Building facades
- Pool surrounds
- Textured feature walls
- Patio paving

TRAVERTINE COLLECTION · VEIN-CUT

Persian Silver Travertine

Sleek, strictly parallel bands of charcoal, silver-grey, taupe and white.

Material

Persian Silver Travertine, vein-cut.

Visual Characteristics

A highly architectural slab with strictly parallel striations from the vein-cut process. The linear banding combines deep charcoal, silver-grey, warm taupe and crisp white ribbons, with the classic, naturally porous texture of raw travertine.

Aesthetic & Application

Silver Travertine is a firm favourite in contemporary UK and European architecture for its sleek, linear look. Its weather resistance and strength make it ideal for high-end building facades, modern pool surrounds, interior wall cladding and minimalist bathrooms.

IDEAL FOR

- High-end facades
- Modern pool surrounds
- Interior wall cladding
- Minimalist bathrooms

TEXTURE CLOSE-UP

Unfilled: the raw surface of the stone

This close-up shows vein-cut Silver Travertine before any surface processing, with the open pores and natural voids the stone is quarried with. Layers of compression and minerals form its unmistakable ribbons of time in greys, creamy beiges, platinum and dark charcoal.

Unfilled travertine is sought after for modern and rustic looks, especially outdoor flooring and feature walls. For high-traffic interiors such as kitchen worktops, the pores are usually filled with resin, mastic or cement for a smooth, workable surface.
